

AssetNova

User Workflows & Role Guide

Renewable-energy fleet intelligence platform. Seven role-based workflows across portfolio oversight, asset operations, field response, performance engineering and client sharing — each covering the exact steps to complete real business tasks.

#	Role	Login Email	Landing Route
1	Administrator	admin@assetnova.com	/admin
2	Executive	executive@assetnova.com	/overview
3	Asset Manager	assetmgr@assetnova.com	/dashboard
4	O&M Manager	ops@assetnova.com	/operations
5	Field Technician	tech@assetnova.com	/my-work
6	Performance Engineer	perf@assetnova.com	/performance
7	Client Viewer	client@assetnova.com	/client-portal

Administrator

admin@assetnova.com · Admin@123 · lands on /admin

Super-user with unrestricted access. Manages users, roles, client scopes, and platform-wide configuration.

Permissions

- Every endpoint and route (super-role)
- Assign / revoke roles for any user
- Set client_viewer site scopes
- View Leads Inbox and download credentials CSV
- Read + write across all fleet data

Key Workflows

■ Log in and land on /admin dashboard

1. Open the app in a browser
2. Click 'Login' in the top-right
3. Enter admin@assetnova.com / Admin@123
4. Click 'Sign In'
5. Verify redirect to /admin with KPI cards, Leads Inbox, User Management

■ Invite a new teammate

1. From /admin click 'Invite new' in the User Management header
2. Enter name, email, primary role, initial password
3. Submit — new row appears in the users table
4. Confirm invitee can log in with the credentials you set

■ Change a user's primary role

1. Locate the user row in User Management
2. Open the Primary Role dropdown
3. Select a new role — the change is auto-saved
4. Verify a success toast appears at the bottom of the screen

■ Grant a user extra roles (multi-role)

1. Find the target user row
2. Click each Extra Role pill you want to enable (Executive / Asset / O&M; / Field / Performance / Client)
3. Log out and log back in as the target user
4. Verify the Workspace Switcher appears in the sidebar with the extra roles

■ Scope a Client Viewer to specific sites

1. Find the client_viewer row

2. Click 'EDIT SITES' in the Scope column
3. In the modal, tick site categories and/or individual site IDs
4. Save — the scope is stored on the user document
5. Log in as that client to verify they only see the approved sites

■ **Download team credentials CSV**

1. Click 'Team credentials · CSV' in the Administration header
2. Verify the CSV downloads with all 28 users' emails + plain passwords + roles

■ **Review Book-a-Demo leads**

1. Scroll to the LEADS INBOX card on /admin
2. Verify newest submissions appear first
3. Click a lead's email to open a mailto: draft

Executive

executive@assetnova.com · Executive@123 · lands on /overview

Portfolio-level oversight. Consumes read-only KPIs across the entire fleet without operating on individual assets.

Permissions

- Read: Overview, Dashboard, Reports, Snapshots
- Cannot modify alarms, work orders, users, or scope

Key Workflows

■ Portfolio health check

1. Log in as executive@assetnova.com / Executive@123
2. Land on /overview — verify Portfolio KPIs (health %, CO₂ avoided, revenue at risk)
3. Verify the Mix-by-Category donut and Top Risks strip render live data

■ Compare live dashboard slices

1. Navigate to Dashboard in the sidebar
2. Use the Category switcher to filter Utility-Scale Solar / Wind / BESS
3. Verify the six KPI tiles, fleet table, and alarm feed update per category

■ Schedule a weekly AI digest

1. Open Reports from the sidebar
2. Toggle 'Weekly AI Digest' → set day / time / recipients
3. Save and verify the schedule appears in the Recent Digests strip

■ Share a read-only snapshot with a stakeholder

1. From Reports → click 'Create Snapshot'
2. Copy the generated /snapshot/ URL
3. Open the URL in an incognito window and verify it loads without auth

Asset Manager

assetmgr@assetnova.com · Asset@123 · lands on /dashboard

Owns commercial performance of a portfolio segment. Deep-dives sites, triages alarms, and initiates actions.

Permissions

- Read: Overview, Dashboard, Site Detail, Performance, Reports, Alerts
- Write: Acknowledge alarms, create actions, upload evidence, manage work orders

Key Workflows

■ Diagnose an underperforming site

1. Log in as assetmgr@assetnova.com / Asset@123
2. On /dashboard sort the fleet table by PR% ascending
3. Click the worst site to open /site/:site_id
4. Verify 4 KPI cards, live-window telemetry chart, asset breakdown, alarms/WOs

■ Acknowledge and action an alarm

1. Open /alerts
2. Click a P1 alarm
3. Click Acknowledge → verify a toast confirms
4. Click Create Action → fill title/owner/due, submit

■ Export a portfolio PDF report

1. Navigate to Reports
2. Click Export PDF — verify the JS-generated PDF downloads with your branding

O&M; Manager

ops@assetnova.com · Ops@123 · lands on /operations

Owns operational resolution. Runs the Operations Center — alarms triage, work order boards, resolution SLA.

Permissions

- Read: Operations, Alerts, Work Orders, Site Detail, My Work
- Write: Assign / close work orders, escalate alarms, upload evidence

Key Workflows

■ Triage overnight alarms

1. Log in as ops@assetnova.com / Ops@123
2. Land on /operations — verify alarm feed, resolution rate, WO board
3. Click a critical alarm → confirm it opens with root-cause + affected assets

■ Assign a work order to a technician

1. Navigate to Work Orders
2. Find a 'Created' WO and drag / dropdown-move it to 'In Progress'
3. Assign to a technician user (e.g. Tara Foster)
4. Verify status change persists after page reload

Field Technician

tech@assetnova.com · Tech@123 · lands on /my-work

Mobile-first field operator. Sees only their assigned work; can complete diagnostic checklists and upload photo evidence.

Permissions

- Read: /my-work only
- Write: Complete WO steps, upload evidence photos

Key Workflows

■ Complete an assigned work order

1. Log in as tech@assetnova.com / Tech@123 on a mobile viewport (390×844)
2. Land on /my-work — verify assigned alarm cards
3. Tap an alarm to open the bottom-sheet Diagnose flow
4. Tick each of the 4 checklist steps
5. Tap the camera icon → attach a photo (uploaded via Emergent Object Storage)
6. Tap Complete — verify the alarm disappears from My Work

Performance Engineer

perf@assetnova.com · Perf@123 · lands on /performance

Diagnostic analytics specialist. Focused on Yield / Degradation / Loss / Data-Quality and root-cause patterns.

Permissions

- Read: Performance Analytics, Site Detail, Dashboard, Alerts
- Write: Create actions, comment on alarms

Key Workflows

■ Investigate a degradation trend

1. Log in as perf@assetnova.com / Perf@123
2. Land on /performance — verify 4 stat tiles (Yield, Degradation, Loss, Data-Quality)
3. Scan the worst-PR% benchmarking table
4. Click a site to open Site Detail and cross-check the telemetry trend

■ Root-cause pareto

1. From /performance scroll to Root-Cause Pareto
2. Verify the top 5 causes with % share and click one to filter alarms accordingly

Client Viewer

client@assetnova.com · Client@123 · lands on /client-portal

External read-only guest scoped to a subset of sites by the Admin. Sees no other portfolio data.

Permissions

- Read: /client-portal only (scoped sites)
- Cannot see other users, sites outside scope, or admin controls

Key Workflows

■ View scoped portfolio

1. Log in as client@assetnova.com / Client@123
2. Land on /client-portal — verify 20 solar site tiles + 4 aggregate KPI cards
3. Try navigating to /admin — verify 403 or redirect
4. Try navigating to /dashboard — verify redirect back to /client-portal
